### GARBER

The past week has been very fine weather and yesterday made us feel that spring was at hand with it 70 degrees above, but this morning when it is down to 30 and sky looks stormy it is a change of feelings, but so fine has the weather been that we scarcely see anyone these days; they are all busy at farm work and getting ready for early planting.

Mrs. G. B. Cowley went to Branson Monday on business and will go to see Hollister friends while on her trip.

Mr. Harry Cowley wife and children and his mother spent Sunday in Garber visiting with aunt Mollie.

Mr. N. L. Graw and J. A. Jeanmond of Iowa Kansas passed through our place Monday looking at the country, they had walked from Hollister and were going on to Reeds Spring the same way where they will take train for home, they seemed to have a very poor opinion of our rough mountainous country with its rocks and hills, and and were looking for smooth farming land that is not plentiful here.

Rev. Wm. F. Roberts who owns a small farm here is now located at Seattle Washington and is State Evangelist for the Baptist church. He writes us that the work is harder in that country, and while the weather is more moderate, they have a good deal of fog and damp weather and that he will hardly get to spend his vacation with us this summer.

Doc Woods an old resident for many years of the Jakes creek neighborhood, was in Garber Monday, he now lives on Rally creek in Stone county. The move of the gentleman in last weeks paper for the extermination of the wolves should be taken hold of at once by some one that can lead out and a good organization for that purpose, there has been enough goats killed in this part of the county to pay a good bounty and have some left, if some one in each school district would take this up and cooperate with a county affair something might be done to save the stock.

Another thing, the notice of County Superintendent Bennett should be well taken hold of and every child furnished with books free. There is every summer a large number of children whose parents are unable to procure these necessary books at the proper time, and as we have compulsory laws to keep these children in school they should be supplied with the proper books to work with the same as a person that is compelled to work for their maintenance is supplied with the tools to work with, every school board should get busy and talk the matter up before the annual meeting. The teachers might call a meeting of the patrons for that purpose and discuss the matter in a way that all would become interested.
